

And abroad

Germany :

« It started with "me", but it shall continue with "us"! Thanks a lot, sustain.me ! What a project :-))»

Italy :

« ...through the hows and whats of sustainability towards better future living standards!! »

Spain :

« The three Rs, our main goal. We are trying to make our school more sustainable. »

Belgium :

« Our group of students became friends while changing the world, beginning with the school.... Their ambition (and ours) has no borders thanks to Eras-

RECYCLE

I enjoyed discovering others ways of teaching !

learnt about organic growing in order to produce my own vegetable safe of chemical treat-

My parents buy more organic food and stuff like that

Cycle to work

Now understand why sustainability is unavoidable for our future! !

Try to raise my children's awareness about sustainability!

I've got a more sustainable life than ever !

I try to recycle every single thing I can, even the tiniest bit of garbage !

Everyone can do something for the planet on his own level every day. Let's not give up hope: we can still build a better world!

I have a healthier life to protect our environment, my meals are becoming more balanced!

That will impact my job, my future, and my choices !

I keep an eye on my water consumption !

OH no! I've become a sustainability addict!!!

Such a wonderful experience!

My clothes haven't and won't, for now, change since the price problem often is a pull-factor for ecological clothes.

Very rewarding for my English !

I met very nice people and hope I'll keep in touch with them!

I consume less meat !

I became aware that there are many environmental problems but also a lot of solutions!

It helped me feel useful and escape my routine!

In the future I will do my best to have a sustainable life because I'm more aware now!

Allowed me to meet new people, travelling, discovering new and different lifestyles! !

I try to be a mosquito everyday!

Became vegetarians!

I also try to eat less meat, but that is not easy for me because I love it!

It has open new horizons : travelling and meeting real nice people!

I and my family always buy local products and compost organic waste to make fertilizer for flowers.

Taught me to sell or give my old clothes to charities instead of throwing them away !

I make effort to buy in second hand shop first if I want some clothes!

Great and interesting visits!

Try to responsabilize people on sustainability everyday even if it's a little, it's already something!

« For every action we must consider its impacts on the 7th generation! » Iroquois quote

Sustain.me has been an incredibly rewarding... I'm fascinated with all of the innovative solutions and applaud the teachers and students for the dedicated efforts. Well done everybody and many thanks from Mexico!

I want to become an ambassador of sustainability !

As the deputy headmistress, I enjoyed to have a good time with the students !
